CAREER OBJECTIVE

I am a motivated and passionate front-end web developer with a strong foundation in HTML, CSS, JS, React, and other modern web technologies. I am excited to use my knowledge and creativity to build user-friendly, responsive web applications. My goal is to become proficient in Next.js and TypeScript and to grow as an expert in these technologies to create efficient and scalable web applications that provide great user experiences.

COURSE

- **MERN Stack** Web Development
Programming Hero Institute, Online

LANGUAGES

- **Bangla** (Native)
- **English** (Fluent)

SKILLS

- **Frontend Technologies:** HTML5, CSS3, Tailwindcss, JavaScript, React.Next.js
- **Backend Technologies:** Node.js, Express.js, Firebase, MongoDB.
- **Version Control:** Git, GitHub.
- **Soft Skills:** Problem-solving, Quick Learner, Team Work, Responsibility.

PROJECTS

1. TrustPharma (Multi-Vendor E-Commerce Website) [Live Preview](#) | [Client](#) | [Server](#)

Key Features:

- The website allows different user roles, with separate dashboards for Admin and Seller, making it easier to manage user access and features.
- A dynamic advertisement banner enhances user interaction and displays personalized content, improving the website's engagement.
- The website has a safe checkout system for easy payments, gives users an invoice after payment, and lets them see their full purchase history with transaction IDs and times.

Technologies: Tailwind, React, React Router, TanStack Query, JWT, Firebase, ExpressJs, MongoDB

2. Ask Me Queries (Product recommendation platform) [Live Preview](#) | [Client](#) | [Server](#)

Key Features:

- Users get product ideas that match their needs and preferences, making shopping easier.
- Secure sign-in and registration through Firebase Authentication, along with JWT session management.
- A dedicated section displays the latest questions and concerns from the community, providing users with current insights and advice.

Technologies: Tailwind, React, React Router, JWT, Firebase, ExpressJs, MongoDB.

3. Sports Hub (Sports Equipment Store) [Live Preview](#) | [Client](#) | [Server](#)

Key Features:

- The site provides product details pages, displaying pricing, specifications, and availability for each item.
- includes a "Sort by Price" feature, allowing users to arrange products from lowest to highest price.
- includes a customer feedback section where users can leave reviews for other customers.

Technologies: Tailwind, React, React Router, JWT, Firebase, ExpressJs, MongoDB.
